Another helpful thread jack. Nice. 😊

* - [mobileshaun](#) - 03-31-2014 08:35 PM

Awesome, also, maybe we should also break down into manufacturers and even down to models, since maybe they have different ways to get a default WPS key, I had an old dlink router that had the flaw of taking the last 3 sections of mac address and converting it into decimal to get the default wps key, and there are other brands that do this, but found only one or two other dlinks while wardriving

* - [JackChitt](#) - 03-31-2014 09:01 PM

Was still working on thread when you 2 posted!!

(03-31-2014 08:35 PM)mobileshaun Wrote: ►Awesome, also, maybe we should also break down into manufacturers and even down to models, since maybe they have different ways to get a default WPS key,

Good luck compiling enough of one brand and model to find the algorithm if in fact there is one. 😊
Remember this list of wps pins came from members post..

* - [mobileshaun](#) - 03-31-2014 09:24 PM

Well, I know alot of dlink routers are set to allow remote management on port 8080 by default, and if you select the 'user' profile, with no password, it lets you in, you can't ALWAYS change settings, but you can see everything, including mac address, and default wps pin, and you see the model of router on top, nmap'ing ports 8080, 8081, 82 etc (my ISP's block port 80 here) will find you some pretty weird results sometimes....

You can also reset the config login on 2WireXXX routers by clicking the recovery link. Then you will be asked a security question. Click still don't know. You will then be asked for the routers serial number. If the wireless's password is a 10 digit number then you have the serial. Enter it and you will be asked to set a password. I suggest setting it to the routers default so the owner will not be too suspicious.

This doesn't work on all but most I have attempted it on..

* - [mobileshaun](#) - 04-01-2014 05:05 PM

Interesting... but this method would require already being logged into the network... where as port scanning 8080, you can find alot more

* - [3xp1r3](#) - 04-01-2014 05:44 PM

Add this one ,From BD , Living In :- Saudi Arabia ,

Router [Mobily Connect 4G Router]
WPS PIN :- 00170116
Custom :- SSID :- LOYO_ROUTER

Whole Details
Spoiler ([Click to View](#))

* - [PinkPanther](#) - **04-02-2014 03:25 PM**

Finally, someone compiled them all! Maybe someone can do something with them.

* - [Bonfire.](#) - **04-02-2014 07:30 PM**

This looks very nice Jack. I didn't even notice this when you posted it. Nice job, and thank you.
