Yes that was exactly what i had in mind!!! Anyone have a similiar script or?
(Scripting/programming is my weakest LINK((No-Time, got to small babys :D)))

Glad that the seed I planted (although by the looks of it was already there, just needed water :)), has stimulated the brain. Please post back your findings, and I anticipate successes. Bravo

Update :) Yes and what a seed, hatched me a beanstalk

Due to familiy business i havent have some work done for over a day, BUT i have made a script automating the hole process in a loop, works perfect, U r the GeeMann ;)

Attack against said Target are resumed (Automated now), and i will get back with type, Pin and full "tutorial" when cracked.

Keep up the good work!!

proxx - perhaps put them in a .csv file as opposed to a .txt? Even a .xls (excel) spreadsheet would be fine, seperated by
Make | Model | Country | ISP | SSID | MAC | PIN | (Pass?)

That way you can rather quickly collate the results, esp if you import them into a SQL database for parsing and such.

Just an idea :)

BTW, perhaps putting the data up on Github? So more people can contribute? Or google docs?

AP: MojaMreza1
PIN: 15308962
PSK: 6B251CCFFB

It's a Thomson router, i don't know the exact model but i bet it's TG782i because T-Com uses them often in my country.
