In my opinion it would be very important to collect all the pins in a single page divided into various brands and models, this would make everything more settled and easy location if you are looking for a specific router.

Hi!

Can anyone help me to get an application that give the default wps pin for thomson tg784?

Hi have 3 Thomson in my street but they change the main password. Now I need the WPS PIN.

I try with reaver, but they Lock every 10 attemps. I use the ELT funtions but they lock.

If someone need some data, I have MAC and SSID.

If Someone ultra-intelligent need some data to get the algorythm I Have MAC,SSID and WPS PIN from 2 Thomson tg784.

Thanks
