I hope you and your gf will be alright bro.
Most of the time things work themselves out.

Thank you:) she's a hard one ;p
Will post more pins tonight at my other home ;)

I have a shitload to add Proxx but not at home. Will post when in front of my baby
and not a remote connection. I think your on to something that I can understand.

Thus far , not all pins are added yet.
I will soon.
clearly the server is running windows or something like that.
The Tabs have different lenght :P

Nice work so far :D TY proxx and all other contributers. Can see there are a few essid´s roaming my neighbourhood with some of the names in the list, will try some combinations of the pins matching from the list against the wifi´s to see if i (at least) can establish a pattern of sorts.
I am currently working on a wps attack against a (i THINK it is)(Used by TDC customers in Denmark) a sagemCOM router wich has WPS locked, and also AP rate limiting. HARD and TIME consuming because i get kicked every 15 min or so, and thats only when i am allowed to get associated. But mingling some workaround with mdk3, i am getting the router to restart, thus i can attack it again for 15 min before the lock sets in.
Anyone who have tried something similiar?? Maybe a better workaround PLZ let me know.
In the mean time i am continuing the attack and getting back with the pins, and the method i have used for the locked router, when cracked!

Keep up the good work

I have not come across this but I would think that a script to attack for a specified time and then launch a mdk3 attack followed by a cool down period of 1 min and then relaunch the script (loop) would avoid doing this manually and while your sleeping/working etc.
